## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments, see pages 5-8, filed 9 May 2005 with respect to claims 1 and 3 have been fully considered and are persuasive. The 35 U.S.C 102(b) rejection of claim 1 based on Delisle ('076 reference), 35 U.S.C 102(e) rejection of claim 1 based on Cao ('296 reference), and the 35 U.S.C 102(e) rejection of claim 1 based on Cao ('126 reference), have been withdrawn.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
  3. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Green et al. US 6879619 B1 (hereinafter Green) in view of Land et al. US 5,170,290 (Land).
- Regarding claim 9, Green disclosed
- a tunable periodic filter for dropping or adding ( **see col. 2, lines 45-50** ) a group of optical wavelengths from/to a spectrum of optical wavelengths being members of an ITU-T grid ( **see col. 2, lines 55-57** ) transmitted over an optical line ( **see col. 5, lines 15-20** ) so that adjacent optical wavelengths in the spectrum are initially spaced from one another by a basic wavelength step "s", wherein said tunable periodic filter is inserted in said optical line as a primary filter and is constructed to pick selected wavelengths of the group such that adjacent wavelengths of the group are spaced from one another by a group step being equal to ks, **see col. 11, lines 55-60**.

Green does not disclose where wherein K is an integer >2.

Land disclosed where a tunable comb filter can have a spectral difference substantially larger (2

Art Unit: 2638

times or more) than the line half-widths, **see Land col. 5, lines 8-11**. It would have been obvious to one of ordinary skill in the art at the time of invention to use make the tunable filter in Green of a group step larger than 2. One is motivated as such so that a broad light band may be moderated to high and that any specific frequency band of interest could be reflected out, **see Land col. 5, lines 1-11**.

***Allowable Subject Matter***

4. Claims 1, 3 and 8 are allowed.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
